## IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Aqua Pennsylvania Chinchilla I, Chinchilla II, and Stanton Water Systems  
(PWSID #'s PA2350037, PA2350036 & PA2350004)

## BOIL YOUR WATER BEFORE CONSUMPTION

### HIERVAN EL AGUA ANTES DE USARLA.

ESTE INFORME CONTIENE INFORMACIÓN MUY IMPORTANTE SOBRE SU AGUA POTABLE.

TRADÚZCALO O HABLE CON ALGUIEN QUE LO ENTIENDA BIEN

Aqua Pennsylvania, Inc. (Aqua) has issued a boil water advisory for customers in the Chinchilla I, Chinchilla II, and Stanton water systems as a result of a plumbing failure at one of the well treatment stations on Tuesday morning, June 5, which resulted in a water outage for many customers. For this reason, Aqua customers are advised to use boiled or bottled water for drinking, making ice, brushing teeth, washing dishes and food preparation until further notice. You will be notified when this advisory is lifted.

#### What should I do?

- **DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST.** Bring all water to a boil, let it boil for one minute, and let it cool before using, or use bottled water. Boiled or bottled water should be used for drinking, making ice, brushing teeth, washing dishes, and food preparation **until further notice**. Boiling kills bacteria and other organisms in the water.
- ***Disinfection provides protection against the presence of bacteria, which could result from contamination due to human or animal wastes. Microbes in these wastes can cause diarrhea, cramps, nausea, headaches, or other symptoms. They might pose a special health risk for infants, young children, some of the elderly, and people with severely compromised immune systems.***
- The symptoms above are not caused only by organisms in drinking water. If you experience any of these symptoms and they persist, you might want to seek medical advice. People at increased risk should seek advice about drinking water from their health care providers.

#### What happened? What is being done? When will the problem be corrected?

A plumbing failure resulted in a water outage for many customers of the Chinchilla I, Chinchilla II, and Stanton water systems. While repairs are being made to the leak, bulk water will be trucked into to the system so water service can be restored as quickly as possible. Until water sample test results are received from the laboratory, Aqua customers are advised to use boiled or bottled water for drinking, making ice, brushing teeth, washing dishes and food preparation until further notice, which would be no sooner than Thursday, June 7.

General guidelines on ways to lessen the risk of infection by microbes are available from the EPA Safe Drinking Water Hotline at 800.426.4791.

***Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.***
